

Nature Wonder

Butterflies

©Dick Tam

God created the great creatures of the sea and every living and moving thing with which the water teems, according to their kinds, and every winged bird according to its kind. And God saw that it was good.

*God blessed them and said, "Be fruitful and increase in number and fill the water in the seas, and let the birds increase on the earth."
(Genesis 1:21-22)*

How does the creator create this world full of nature wonders. This is the second series about the wonders in this world -- BUTTERFLIES. They are very easy to see these small insects with a pair of colored wing. This book has been photoed to provide a general view of fascinating butterflies fauna of Hong Kong. The species found in Hong Kong, where is a small area, represent a meaningful fraction of the world's approximately 15000 species.

*To my wife - Florence
daughter - Wing Yan*

Hong Kong's Butterflies

Nymphalidae

Common Jester
